Leiden

Teamwork

Mirjam van Reisen

Philip Opiyo

Onesmus Wanjiku

Liam van Dreumel

Joëlle Stocker

Purpose

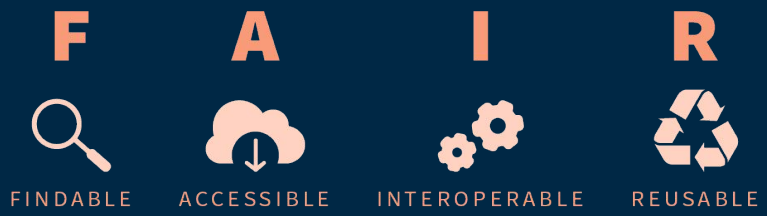
Create a simple and safe way for trusted NGO staff to enter structured data about incidents of sexual violence.

FAIR-based ontology

Efficient and Secure ETL

Clarity, Safety and Usability

Insight into sexual violence in East-Africa, allowing awareness, aid & policy changes



Regulations, Privacy and Security

Legal: GDPR, Ugandan Data Law.

Ethics: "Do No Harm", Informed Consent.

Access: Least Privilege, RBAC.

Protection: Anonymisation, Encryption, Data Minimisation.

Accountability: Logging, Lockdown Protocol.

Extract – Transform – Load

1. Fill in form
2. Map to RDF Triples
   Common Data Model
3. Store in Graph Database
4. Store in FAIR Data Point
5. SPARQL Query – Access to endpoints
